EXPERIENCE

React Developer (SharePoint SPFx) **July 2025 - October 2025**
M365Connect, Remote

- Developed and maintained frontend applications (e.g., Manatal Shortlisting LLM, Work Tracker app) using React, TypeScript, and Tailwind CSS, ensuring responsive and user-friendly interfaces.
- Conduct code reviews and implement bug fixes to improve code quality, maintainability, and team productivity.
- Implemented testing and code-quality practices using Prettier, ESLint, and Husky for formatting, linting, and safe committing workflows.
- Collaborate within Agile teams alongside UI/UX designers, WordPress developers, and backend engineers to deliver integrated project solutions.
- Create and structure JSON files to support backend teams and enable seamless API integration.
- Leverage AI coding assistants such as Claude Code to enhance development workflows and problem-solving efficiency.
- Participate in recruitment processes, interviewing and evaluating new hires to build stronger development teams.
- Work remotely in a full-time capacity (8 hours daily), demonstrating adaptability and self-discipline in distributed team environments.

Field Technician **February 2025 - June 2025**
SIMBA Fiber Africa

- LAN/WAN troubleshooting
- IT support for router configurations

Frontend Developer **July 2024 - February 2025**
Cognosphere Dynamics, Onsite

- Contributed to frontend web development for projects such as Gitcash (now modified), Go-Live, YoDegree, and internal dashboards, using HTML, CSS, JavaScript, and React.js to build engaging and functional user interfaces.
- Collaborated closely with backend and mobile teams to integrate APIs and deliver high-quality, cross-platform solutions aligned with business goals.
